Re: Enhancements to the CTMi Terminal Application

An enhancement release to the CBOE CTMi terminal application containing the items listed below will be implemented on Monday, December 15, 2008.

- Customer ID field has been added to the trade entry screen and all trade maintenance screens.
- On the Trade Entry screen, the order of the Opp. Broker and Opp. Firm fields have flipped.
- On the Trade Entry screen, the auto-tab has been activated for all fields. This function will automatically forward the cursor to the next field when all available spaces of a field have been entered.
- On the Trade Query screen, the MM Account has been added to the search criteria fields.
- On the Trade Query screen, the search function by ORSID will return only the trade records associated with the entered ORSID.

If you have any questions regarding this notice, please contact David Glover at 786-7957.
