

EXECUTE SUCCESS<sup>SM</sup>

## CBOE Information Circular IC14-028

**Date:** March 27, 2014

**To:** Trading Permit Holders and Representatives

**From:** CBOE Facilities Department

**Re:** CBOE Power Shutdown

On Friday, April 18, 2014, the Facilities Department will be conducting maintenance on the electrical infrastructure network within the building. In order to complete this work, a shutdown of power is required for the entire building including the Data Centers and Trading Floor. The power-down window will be between the hours of 08:00 a.m. (CT) beginning on Friday, April 18, 2014 through 8:00 a.m. (CT) Saturday, April 19, 2014. The power-down will affect convenience power (plug power), lighting, computers, elevators and potable water.

Please note the power-down will **not** affect the equipment located at NY4.

Expiration processing will be completed Thursday (April 17, 2014) evening according to the evening expiration schedule. (See CBOE Regulatory Circular 14-039 regarding Expiring Exercise Declaration Submissions for Thursday, April 17, 2014). Firms will be able to send transmissions Thursday evening.

As a result:

- Trading Permit Holder (TPH) representatives should turn off their respective CBOE Trading Floor and second floor systems on Thursday, April 17, 2014, before leaving for the weekend.
- During the power-down window no one will be allowed access into the building.

TPHs and their representatives should arrange to come in and power up their respective systems on either Saturday April 19, 2014 between the hours of 2:00 p.m. and 4:00 p.m. (CT) or Sunday April 20, 2014 between the hours on 9:00 a.m. and 11:00 a.m. (CT). Access to the building will be permitted through the main entry (North Side). Those looking to gain entry will be required to have a building ID. CBOE access badges will work on the Saturday or Sunday after the power shutdown even if the badge normally has only Monday through Friday access.

Thank you in advance for your cooperation.
