

CBOE Regulatory Circular RG17-076

Date: May 22, 2017

To: Trading Permit Holders

From: Business Development Division

RE: Announcement of a New Operational Settings Webpage on the CBOE Website

Effective May 22, 2017, the Chicago Board Options Exchange, Incorporated (CBOE or the Exchange) will introduce a new webpage to the Trading Main page located on the CBOE.org website. The new webpage, called CBOE Operational Settings, will provide Trading Permit Holders (TPHs) and other authorized viewers with a streamlined guide to the settings applicable to trading on the CBOE during the Regular Trading Hours (RTH) session.

The Operational Settings page for RTH is organized by class type, and within each class type are the settings related to the Opening Process, Electronic Orders and Access, Crossing Mechanisms, Auction Mechanisms, certain Quoting Requirements, and other operational details. An additional link to a class listing by Business Cluster (BC) is also provided. The Operational Settings page likewise contains links to other pages on the website. For example, material concerning auctions may be found simply by selecting the appropriate link in the related topic. Furthermore, links to rules regarding these topics and settings are also provided.

Future circulars that are issued to announce new or modified operational settings will contain a link to the CBOE Operational Settings page, and applicable settings on the page will be updated accordingly. Furthermore, CBOE plans to expand the webpage over time to include other settings and links.

CBOE expects to issue a circular in the near future to announce an Operational Settings page for the Extended Trading Hours session (ETH) and C2.

Please use this link to view the new CBOE Operational Settings webpage:
